Common Poker Tells - How to Read People in Poker

October 30, 2024 Giovanni Angioni

Contributor Calum Grant Editor & Live Reporter

Understanding poker tells is crucial in

Texas Hold'em but is often overlooked by new players, who could benefit from poker coaching.

These tells or subtle cues, whether deliberate or unconscious, offer valuable insights into an opponent's hand. Self-awareness is key before decoding others, as recognizing personal tells prepares players to interpret and use others' cues effectively.

What is a Tell in Poker?

A poker tell refers to any physical, verbal, or behavioral cue exhibited by a player during a game, inadvertently revealing information about the strength of their hand. These cues can be conscious or unconscious gestures, such as changes in posture, speech patterns, eye movements, or betting behaviors.

Tells

may provide opponents with hints about a player's confidence in and the quality of their hand. Some tells can give you information on whether an opponent is bluffing or whether they have a really strong poker hand.

Mastering the interpretation of these

subtle signals allows astute players to gain insights into their opponents' likely actions, enhancing decision-making and strategic advantage in the dynamic game of poker.

Top 5 Most Common Poker Tells

Poker tells come in all sorts of shapes and (bet)

sizes, and below are some examples of the most common tells in poker. Make sure to read the explanations provided to get a better understanding of how they work.

Eye

Contact

Time to Act

Handling of Chips/Cards

Attentiveness

Table Talk

In poker, eye

contact can display a player's confidence or discomfort. Avoiding eye contact might signal weakness or nervousness, while prolonged stares might be an attempt to intimidate or mislead opponents.

Poker pro Daniel Negreanu is also a big proponent of

eye contact being a useful tell. If a player likes a flop, for example, their eyes will

quickly glance down at their chips, which is an indicator that they like their hand and want to build up the pot.

#### Time to Act

The time a player takes to act reflects decision-making. Quick decisions might signal a strong hand or eagerness to bet, whereas prolonged delays could suggest uncertainty or strategic planning for a bluff.

#### Handling of Chips/Cards

Subtle actions, like nervous chip shuffling or hesitation when handling cards, can indicate insecurity or a lack of confidence.

Conversely, swift and controlled movements often accompany a strong hand.

#### Attentiveness

Players' attention towards the game speaks volumes. Lack of focus or distractibility might reveal disinterest, potentially signalling a weaker hand.

Conversely, intense focus can indicate a strong hand or a player plotting their next move.

#### Table Talk

Verbal clues in poker conversations provide valuable insights.

Offering excessive information might signal nervousness or an attempt to mislead opponents. Silence, or specific topics, may imply a player's confidence or discomfort with their hand. Identifying and decoding these verbal cues adds depth to understanding opponents' strategies and hands.

#### How to Hide/Avoid Giving off Your Tells

In poker, it's

super important to keep a straight face and not give away any hints about your cards. But it's just as key to watch others closely to figure out what they might have. Hiding your own clues and catching theirs gives you a big edge in the game. It's like a secret weapon for winning at poker.

#### Be Aware of How You Act When Betting

It's crucial to pay

attention to your betting actions in poker because they might give away the strength of your hand. Staying consistent in your moves helps keep your strategy under wraps. Being mindful of your betting style prevents opponents from getting hints and helps you stay ahead in the game.

Bad players may put chips into the pot in a certain way when they have a strong hand and then do it differently when they're bluffing.

#### Be Aware of Timing

Tells

Knowing about timing tells in poker matters a lot because how fast or slow someone makes their moves gives hints about their cards. Quick actions might show they're confident, while waiting could mean they're unsure.

If you find that you're

acting faster when you're strong, you should just wait a few more moments before making your action.

#### Avoid 'Acting' in a Hand

It's best not to overdo actions when playing

poker because pretending too much might show others what you're up to. If you act too much, it can make things obvious and let opponents figure out information about your cards or plans, making it harder to win.

A famous example is Hollywood Star Matt Damon

at the World Series of Poker. The acting skills on display are more like what you'd see at a local theatre rather than from someone with multiple Academy Awards.

Try to be

Stoic

Remaining stoic in poker is crucial as it prevents revealing emotions that could give opponents insights into your hand or strategy. A calm, composed demeanour conceals intentions, making it harder for others to predict your moves, maintaining a strategic advantage and control over the game.

Final Thoughts

These five types of tells all come

from live poker, although you should know that tells can sometimes be worth seeking out when playing real money online poker, too. For some examples, see Nathan Williams' article titled "7 Ways to Get Better Reads When Playing Online Poker."

Some players

give off tells unwittingly, but there are also players who will deliberately "act" at the table in an effort to deceive opponents with "false tells." That means with all of the tells discussed above, you might encounter players exhibiting the tell in an effort to indicate the opposite of what it normally might signify.

For instance, a player

might hold his cards in a way that makes it look like he's about to fold, encouraging you to bet, but then stay in the hand and put in a raise. Also, take heed of that point about looking for patterns first before jumping to conclusions about an apparent tell.

Have you seen the player making eye contact on multiple occasions, then showing strong hands each time? That might make the eye contact tell more reliable the next time you see it. But if there's no pattern against which to compare the action, be careful not to overvalue the tell.

Finally, especially for new players, it's probably

much better to pay attention to betting patterns than behavioral ones — those tend to be much more dependable indicators of players' relative hand strength.

Poker Tells

FAQs

What are tells in poker? Poker tells are changes in a player's behaviour that can give information about the player's hand strength. How can you tell a poker tell? Some common poker tells, like the ones described extensively on this page, are easy to identify. Just follow the instructions in the article to learn how. Others might be more subtle. That's why you will need to observe your opponents over a long period of time and understand what their usual reactions to poker hands are and what can be identified as a poker tell. How can you tell if someone is bluffing in poker? Eye contact, trembling hands, chip glances, phone glances, and table talk are only a few of the most common poker tells in poker. Knowing how to read poker players and spot any of these poker tells will help you understand if someone is bluffing (i.e. misrepresenting the hand) or not. Are there online poker tells? Yes, although online poker tells are different from live poker ones. Online poker tells revolves around factors like bet sizing, the time spent sizing a bet, the behaviour at the table, and more. Read this handy collection of online poker tips for more detailed information on how to become a better online poker player. What's the best book to learn more about poker tells? You can learn more about poker tells and how to read poker players with the Caro's Book of Poker Tells by Mike Caro, Exploiting Poker Tells by Zachary Elwood, and Verbal Poker Tells again by Zachary Elwood.

Sharelines A discussion of five common "tells" -- both physical and verbal -- that turn up at the poker tables.

Making eye contact, acting

quickly, trembling hands, table talk -- what do these poker "tells" mean?
