Terrible game.

I just bought this, as I was looking for a game that is exactly this premise. Alas, when I found this game, I bought it and I was extremely disappointed. Just loading up the game took forever, and I kept having to close and reopen it. When it finally opened, it took 17 minutes just to do that. Yeah. Now it's not like I have a terrible laptop, my laptop is really good and I've never had any issues with such a thing. Then, upon opening the game, I couldn't look around because the default settings were set to ultra. For the record, I don't really have an issue with game devs doing this, but it leaves a bitter taste in your mouth. I had to set the quality to very low and even then it was still so laggy. It was 2 fps at the most (like, not stretching the truth here, it was terrible) and not to mention it was very low so it was quite literally just pixels. The game was also very repetitive, so even if you have a NASA super-computer you will get bored of this really quickly. I do not suggest this to anyone, no matter how enticing it looks. It was terrible and so incredibly frustrating; especially because I kept having to meddle with the settings and make the game actually playable (spoiler alert: I couldn't make it playable). Maybe if you have a NASA computer and also happen to have amnesia this game would be quite enjoyable, but unfortunately I see a lot of people having the same disappointment as I am. I really wish I could have this refunded, even just half of the money I spent on this. I'm unsure if Steam would let that happen, so for now I just suggest you don't get this game unless you get it free somehow.
