Arguably the most recognized sport, football is a foreground for almost 4 billion fans, watching from all around the globe. Almost every bookmaker available in the betting industry today, recognizes this spread, spending a wealth of their capital and loads of attention on football betting. The Football betting industry is forever expanding with a constant increase in the variety of its betting markets and with almost every bookmaker (old and upcoming alike) providing good betting tips and betting odds. Football

Betting Odds

To boost your earnings through Football Predictions, it's important you have a solid understanding of the Football Betting odds and also the factors that influence these odds. Decimal and Fractional odds are the two most common formats of representation and you can find many online bookies presenting their football betting odds in this format. Decimal odds are very popular among punters as they are easy to comprehend. Simply put, they represent the amount you win in relation to unit stake you wager. For example, If Liverpool is at 1.5 to win a game of football and you put a stake of 10\$ on them winning, then if the bet wins, you make 1.5×10 which is 15\$, reaping a profit of 5\$ in the process. Fractional odds, on the other hand, are a bit harder to comprehend but are not unfathomable by any means. Here's an example, if the odds are 5/1, then for every 1\$ you stake, you get 5\$ in return. In addition to this, if you are not comfortable with the specific format of odds representation available to

you, you can use an Odd converter to convert and read the odds in the desired format. To learn more about this, check out our article which explains how an odd converter works.

Knowing how to calculate football betting odds is one thing but in order to identify betting opportunities, you must also know what influences these odds. When deciding odds, bookmakers take multiple factors into consideration such as Team strength, a respective form of the teams involved, home team, previous results (head to head), style of play and injuries/ suspensions to name a few. Bookmakers are also known to factor in both team's fixture calendars. Bookmakers never decide odds on their truest probabilities. The odds they provide are always slightly adjusted to factor in a profit margin. The trick is to find value in the bets you place and this is where your knowledge of the sport comes into play. In the simplest terms, a bet has value when the chances of an event happening in our estimation, are higher than what the Bookmaker's odds reflect. The most successful punters in the game are able to identify value opportunities and exploit them. You can learn more about odds and value betting [here](#).

The football betting odds provided by different Bookmakers are subject to their own estimations and never identical, so choosing the right bookmaker that provides you with the best and the most reliable odds is essential. At ProTipster, we provide odds comparison for a wide range of bookmakers. You can check them out, analyze and choose your best option.

How to Bet on Football

The football betting industry is immense and betting in it, could prove to be a daunting prospect for new punters. With this in mind, a knowhow of the various betting markets available and different type of bets that can be placed in them is essential. The following are two common types of bets you can place in football betting:

Singles - Placing a single bet is very common in football betting. Simply put, if you make one individual selection and that bet wins, you get your winnings in respect to that bet. They are not affected by the outcome of other selections you may or may not have made. Single bets are risk-free and easy to understand.

They are not affected by the outcome of other selections you may or may not have made. Single bets are risk-free and easy to understand.

Accumulators - Accumulators or combo bets are very popular in football betting as they yield high profits. In this, all your selections accumulate into one bet and in order for you to win, each selection has to be a winner. For example, if you make 4 selections at odds of 1.5, 2.0, 2.75 and 3.5 respectively and place a stake of 20\$ equally divided across these four selections, the odds combine ($1.5 \times 2.0 \times 2.75 \times 3.5$) to give you new odds of 28.9 and if all four of your selections win, then you are looking at a payout of 578\$ on just a 20\$ stake. Accumulators are extremely profitable but at the same time risky as even if one of your selection fails, you lose the bet and your stake. It is therefore important to find value in each of your bet selections when betting on accumulators. Incidentally, ProTipster offers football accumulator tips on its site. There are a number of Football betting markets available for your perusal and some of the most common and popular ones are as follows:

Full time Result - Simple and the most common form of football betting wherein you bet on the result of the match. 3 way betting (1X2 betting), Asian handicap and Double chance are popular types of bets you can place in this market. 1X2 betting games

make draws more interesting whilst Asian handicap helps even the playing field when one team is a clear favourite to win. Double chance meanwhile, allows you to bet on two possible outcomes (ex: home team win /draw). Odds offered on it are generally low but so is the risk is taken. An available side market to bet on is correct score where you try and predict the exact score of the game. It's very popular amongst casual bettors as it generates high odds but is generally not recommended due to the risk factor involved.

Half Time/ Full Time - This market allows you to bet on individual outcomes of the two respective halves. This is a vast market with a total of 9 possible selections to choose from. For example, say you chose to stake on the HT home team /FT draw selection. It means you are betting on the home team to win the first half, but the game to end in a draw. The stake is then split equally between the two halves and you win if both outcomes are true. If only one outcome is correct, then you get refunded that part of your stake and lose the other half.

Over/Under Goals total bets – Another popular football betting market is the over / under goals betting market with the over / under 2.5 goals being its benchmark. It's a very simple type of bet where you bet on whether a match will produce more or less than 2.5 goals. For example, if you bet on over 2.5 goals and the match produces at least 3 goals, then you win the bet.

Football Goalscorer - In this

market, you bet on the player who you think is going to score the first goal of the match. It generally produces high odds as the sample selection of players who are able to score the first goal is very high. Variations to this market like "each way first scorer" where you win if the player you choose scores the 2nd or 3rd goal of the match and the self-explanatory "anytime goalscorer", are also available to bet in.

Other

notable football betting markets include Scorecast (betting on both the first scorer and final result of the game) and League/ Tournament Top scorer. The Football betting Industry is also encompasses off season betting, with many bookmakers providing off season football betting markets such as the Player Transfer betting market, where you bet on which club a particular player will sign with next.

Knowing your football and

knowing your football betting markets will definitely help you make profitable Football predictions but being consistent with those predictions requires having an authentic football betting strategy. Your betting strategy must be unique in terms of combining your football knowledge, ability to understand odds and your ability to identify trends and value opportunities in betting. One of very common football betting systems is to exploit betting trends like market biases, an example of which is betting on short

priced home favourites, where the majority of the crowd bets on the home team ignoring a possible value bet on away team. There are several additional football betting systems worth to mention, but only ProTipster offers you the best football betting tips.

Football long term bets

Having a long term betting strategy is a great way of making money through football betting as all top football leagues and tournaments spread across the world, commence around the same time. In long term betting, you bet on the outright markets which include:

Championship betting - where you predict the winner of the league to be declared at the end of the season.

Relegation betting –

where you predict the team that is going to be relegated.

Golden Boot winner – Where

you predict the top scorer of the league/tournament when.

A good long term betting tip

is to place these bets, right before the respective tournaments and leagues commence as odds tends to exponentially go down as the season progresses. Here's a list of a few things to keep in mind when betting long term:

Only bet on Outright Markets

Only Bet in

leagues / Tournaments that you know

Avoid betting on many selections on the same coupon

Keep track of your bets (to assess profits and losses)

Look for winning bets,

not Value bets.

Football short term bets

Individual football match betting markets

would encompass short term betting. Unlike long term, short term betting is all about finding value opportunities in bets. The most common markets the Full-time result, Half time/Fulltime, First scorer and Over/under 2.5 goals market. All four markets are easy to understand, generate good odds and with a little help from tipsters, bets placed in them could yield profits. Additionally, you can predict the correct score at the end of the match as well. Side markets such as predicting number of corners (per team/per match) are also available to bet on, but not recommended.

Handicaps meanwhile, are a

popular betting type in Football betting and line up well with short term betting. When one team is deemed an outright favourite, it is at very low odds to win. A Handicap is placed on that team, so as to make the game more interesting and add a bit of value to

its odds. For example, Manchester City is (-1.5) against Newcastle (+1). If you bet on City to win, then for you to win the bet, City must overcome their handicap and beat Newcastle. However, if you bet on Newcastle, then even a draw would suffice for you to win that bet as Newcastle is already on a (+1).

In-Play Football Betting

In play

markets are extremely popular in football betting and offer football punters a unique and immersive betting experience. Almost every online bookmaker in the industry offering live football betting markets on their site. Football with its many intricacies is extremely well suited to inplay betting. For example, in a game between two evenly matched sides, pre-match betting become tough and with In-play, you get the opportunity to observe the first 10 - 15 min of the game and then make informed betting decisions. With respect to the happenings of the game, odds are subject to constant shifting in in-play markets and an instance in football that influences this shift is early goals. In a game for example, if the underdog scores an early goal, you'll notice a slight increase in the odds of the favourites winning the game. Similarly, an early red card or an injury will also affect odds. In-play football markets, give you an opportunity to observe these scenarios and also time to identify a possible value bet. Another advantage of In-play football betting is that it offers fast cash outs, designed to boost profits or help you restrict your losses.

Some of the most popular

In-play football betting markets include:

Next goalscorer

Next team to score

Half time

score

E e,
O que acontece com eles, mas pequenas mudanças. Durante semanas ou meses as eleições dominam a vida nacional! Os relatos da mídia e conversas públicas são monopolizados por discussões furiosas de especulação frenética; tudo o mais – formulação das políticas do país para resolver problemas - é uma grande dificuldade na própria razão: sem surpresa quando acaba um pouco os nossos dias descobrimos não ter resolvido quase nenhum dos seus próprios problema...

Grandes questões – tais quais crise ambiental e espiral da acumulação dos ricos - tudo isso não está bem definido no sistema alimentar ou ainda nos resta qualquer ameaça à guerra nuclear sem solução alguma!

Assim como o capitalismo é indiscutivelmente oposto aos mercados, eleições gerais tais que enfrentamos agora poderiam ser vistas com a democracia. Mas assim também muitos aspectos da vida pública têm sido completamente diferentes conceitos e são irremediavelmente confuso: as Eleições não constituem uma Democracia ou um Estado democrático de eleição!

As sociedades anteriores reconheceram a distinção. Aristóteles e Montesquieu observaram que as eleições gerariam (respectivamente) uma regra "oligárquica" ou aristocrática". Depois das revoluções americanas, os projetista de novos sistemas políticos escolheram eleição como forma para excluir da maioria casino bet365 com recusou a conexão quem não confiavam um envolvimento significativo no poder: alguns deles - John Adams James Madison; Antoine Barnave – contra aqueles conceitos democrático-competente dos quais se pode pensar o povo mais poderoso do mundo!
